

MO 6

MAINPRIZE-OFFSHORE
Offshore Maritime Support

Designed by Walker Marine Design, UK – The MO6 was designed and built to perform a multitude of tasks, including crew transfer, offshore bunkering and cargo operations. Capable of transferring personnel in 2m Hs, the MO6 is one of only a handful of vessels capable of achieving this milestone in passenger transfer.

Exceptional heavy cargo transfers are possible due to her large cargo carry capacity of 190m² deck space and 41-ton payload.
